MANSHOOR AHMAD SIDDIQUI · PROJECT PORTFOLIO

Ras Al Khaimah, UAE
manshoor.ahmad@gmail.com | linkedin.com/in/manshoorahmadsiddiqui
github.com/manshoor | manshoor.github.io/projects.html

Companion to my CV. Leading engineering teams since Nov 2019; currently leading 5 engineers on 10+ SaaS products used by 5,000+ customers. Screenshots and demos: manshoor.github.io/projects.html.

UAE PRODUCTS AND CLIENTS

AutoBay (autobay.io) | Own product · TuringEdge · pre-launch · 2026
Multi-tenant SaaS ERP for UAE / GCC automotive workshops, heavy equipment and construction logistics: jobs, parts, vendors, invoicing, accounting, banking, HR, attendance, customer portal, white-label, WhatsApp notifications and an AI add-on. Arabic RTL from day one. 25 modules, 120+ tenant tables isolated with PostgreSQL row-level security, 280+ automated test files, release gates and backup and restore checks.
Stack: Next.js App Router, Express, TypeScript, Drizzle, PostgreSQL 16, Redis, BullMQ, Stripe Connect, WhatsApp Business API, Prometheus, Grafana, Docker
Links: autobay.io

Sky Land Construction ERP | Lead consultant · TuringEdge client · 2026
Existing Odoo 17 ERP of a UAE construction contractor (40+ custom modules: job costing, progress and retention billing, post-dated cheques). Lead a developer extending it with WBS and BOQ sync, variations, subcontract labour, UAE payroll and compliance, and biometric and geo-fenced attendance. Added custom CRM stages and a Gantt timeline, and redesigned the quotation PDF's price chart.
Stack: Odoo 17, Python, OWL, QWeb, PostgreSQL, Docker

Sky Land and Green Light Group websites | Lead consultant · TuringEdge client · 2026
Built Sky Land's React marketing site (skylandconstruction.com) with an in-app, WordPress-style CMS, so staff manage projects, categories, page content and media without code changes. Also built the Green Light Group website (greenlight-group.ae).
Stack: React, React Router, Supabase, Google Maps

AI social media marketing SaaS | Co-lead · Digix Systems · 2026
New AI-assisted social media marketing SaaS: business-scoped accounts, content creation, scheduling and publishing, engagement, analytics, landing pages and leads, QR codes, agency discovery and billing. Co-leading the product with the Digix team and building its video module.
Stack: Laravel 11, Sanctum, Redis, queued jobs and schedulers, React, MUI, TanStack Query, Zustand, i18next with Arabic RTL

UAE client apps (Digix Systems) | Consultant · 2024-present
Ajman Chamber of Commerce and Industry iOS app (member business services); Takaful Customer Care Android app (policies and claims); Tashfa Analytics (healthcare analytics, Android); IBS Maintenance and IBS Manager iOS apps (facility requests, scheduling, analytics); HMV Viqa Investment corporate site.
Stack: iOS, Android, web, REST APIs

AI AND VIDEO PLATFORMS (STRATEGIC MARKETERS / REAL STRATEGIC, INC., USA, REMOTE)

AI video creation platform | Senior developer · technical lead responsibilities since Nov 2019 · 2017-present
Technical lead for Adviddy and its successor ViralVidz: a template and AI video builder used by agencies, producing 2,000–2,800 renders a month. Cut render time from 20–30 minutes to about 3 minutes on a GPU server and reduced server load. Led the render-pipeline redesign connecting the PHP builder to the new React editor (Remotion on AWS Lambda): durable, retryable dispatch and ready callbacks; render watchdog and guarded recovery. Led the team that built S3 to CDN delivery, voice cloning and AI voiceover routing, and usage-based credit billing with audit reports.
Stack: PHP, JavaScript, MySQL, AWS S3 / CloudFront, FFmpeg, Sentry
Links: my.viralvidz.ai/login · my.adviddy.com/login (previous version)

React video editor | Technical lead responsibilities · 2025-present
Web video editor with AI-generated content, music, voiceovers and overlays, rendered serverlessly; added Lambda render reporting.
Stack: Next.js, React, TypeScript, Remotion (Lambda, Player, Renderer), BullMQ, Redis, Sentry
Links: Video rendered by the editor: vidkahuna-videos.s3.amazonaws.com

AI content creation platform | Engineer · 2026
Chat-driven platform that creates images, videos, presentations and social calendars. Built versioned prompt releases and structured Planner / Builder LLM contracts with validation and repair flows.
Stack: LangChain, LangGraph, Claude, Gemini, xAI, fal.ai, RabbitMQ workers, Express, React, Supabase, AWS S3
Links: my.ideolab.ai · Sample video made in IdeoLab: www.youtube.com/shorts/LAXEhuVlliM

Agentic video creation prototype | Contributor · 2026
Conversational orchestrator that routes a user's chat to specialised sub-agents (content, talent, assets) returning structured JSON rendered as dynamic forms, producing a scene blueprint for rendering.
Stack: TypeScript, WebSockets, multi-agent orchestration, MySQL job queue

Ad frame generation service | Hardening and test suite · 2025
Browser-automation service that renders waveform animations and ad frames for video ads, hardened for security and throughput.
Stack: Node.js, Express, Puppeteer, Sentry, Vitest

Marketing SaaS suite | Senior developer · technical lead responsibilities since Nov 2019 · 2016-present
Long-running products used by 5,000+ customers: ad builder, banner builder, reputation reports and review covers, Bright Social (social media management), Easy Content Engine (content creation), funnel maps, landing pages and white-label hosting with custom domains; worked with an external team on 2 lead-generation platforms and an n8n-style automation hub.
Stack: PHP (CodeIgniter, Laravel), JavaScript, Vue, MySQL, Redis, Stripe, Playwright / Puppeteer, OpenAI

DEVELOPER TOOLS AND MACOS APPS (OWN; GITHUB.COM/MANSHOOR, MENUBARPILOT PRIVATE)

Prompter | 2026
macOS app that turns selected code and a spoken request into a polished AI prompt, triggered by a hotkey. Local-first storage, keys in macOS Keychain.
Stack: Tauri 2, Rust, React, TypeScript, SQLite, Whisper (local whisper-rs or OpenAI), Claude / OpenAI

Video Context | 2026
macOS app and local MCP server that turns recordings into a timestamped transcript, OCR'd screenshots and an evidence-linked coding brief for Claude Code, Codex and Cursor. Read-only by default.
Stack: Swift 6, Apple Vision, Whisper, yt-dlp, FFmpeg, MCP (stdio)

MenuBarPilot | 2026
Clean-room macOS menu-bar organiser using only public APIs; privacy-first, no telemetry.
Stack: Swift, AppKit, SwiftUI, Accessibility APIs

Proposal Automator | 2026
Chrome extension, API and dashboard that vets freelance jobs, matches portfolio items and drafts tailored proposals, with analytics.
Stack: TypeScript, Chrome Extensions, Express, Next.js, PostgreSQL, BullMQ, Claude, OpenAI

ElevenLabs MCP server | 2025
Model Context Protocol server exposing ElevenLabs text-to-speech to AI assistants.
Stack: Node.js, MCP, ElevenLabs API, Docker

TuringEdge studio website | In development · 2026
Studio site with encrypted database, queued contact emails, rate limiting and CI-gated auto-deploys with visual regression tests.
Stack: Next.js 16, TypeScript, encrypted SQLite, Redis, BullMQ, Caddy, Playwright, Vitest

Screenshot and GIF API | 2021-2025
Self-hosted API that captures website screenshots and animated GIFs on demand with a job queue.
Stack: Node.js, Express, Puppeteer, Playwright, Redis, Bull, Docker
